

Product Detail

Bristol polyurethane bollards have a polymer casting over an internal steel core.

These combined materials and the construction give the bollards inherent structural strength and ensure that they do not shatter on impact.

The bollards will not rust as they are made from a self-coloured, flame retardant, engineering grade polymer. Minimum maintenance is required.

Available to order in most BS or RAL colours. Gold banding and reflective finishes can be supplied to requirements

- Above Ground Height- 895mm
- Below Ground Depth- 300mm
- Diameter at base- 160mm
- Weight 18 kg
- Fixing- Root fixed, Base-plated, Removable
- Reflectives are available
